PROFILE

I'm a versatile software writer with a strong foundation in software development, network systems, and digital design. As a software developer, I build responsive, efficient, and user-focused applications. I also work as a network technician, where I manage and troubleshoot network infrastructure to ensure smooth connectivity and performance. Beyond code and routers, I express creativity through Blender, crafting 3D models and visual content for both artistic and functional purposes. I thrive at the intersection of logic and creativity.

EXPERIENCE

SWE INTERNSHIP | SWAHILIPOT HUB FOUNDATION | MAY 2024 – AUGUST 2024

- Transformed designs and wireframes into a seamlessly responsive user interface.
- Provided on-site and remote technical support to over 30 staff across various departments maintaining a high satisfaction rate.
- Improved system performance by identifying and troubleshooting hardware/ software issues on organization workstations.
- Participated in the development of Swahilipot Innovation Week website alongside a team of web developers.

EDUCATION

Bachelor of science, Computer Science | September 2021 - April 2025 |
Chuka University

Kenya Certificate of Secondary Education | Nyambaria High School | Grade: B+
